Professional Summary

Product Design Lead with 10+ years of experience leading UX transformation, enterprise product modernization, and scalable design systems across healthcare and SaaS platforms. Proven ability to improve adoption, optimize workflows, and drive product strategy for complex multi-module systems. Experienced in healthcare HMS/EMR platforms, modular product architecture, UX operations, AI-assisted workflows, and cross-functional leadership. Combines strong product thinking with prior software engineering experience to bridge business, design, and engineering effectively.

Core Skills

Product Strategy & UX Leadership	Healthcare HMS & EMR UX
Design Systems & DesignOps	Enterprise SaaS Product Design
Modular Architecture Planning	User Research & Journey Mapping
Figma, Framer, Spline	Rapid Prototyping & Interaction Design
Cross-functional Collaboration	Stakeholder Management
Design Tokens & Component Systems	PRDs & Product Documentation
Workflow Optimization	Agile Product Development

Professional Experience

Product Design Lead | IQLine Sep 2024 – Present

- Leading UX and product modernization initiatives for IQHealth, a modular HMS platform focused on healthcare facility operations, diagnostics, and workflow scalability.
- Designed and launched a Sample Transport Management System enabling end-to-end tracking and transfer of medical samples between facilities and branches.
- Driving architectural redesign of the IQLine healthcare platform with focus on modularity, integrations, scalability, and multi-product interoperability.
- Contributed to Student Management System workflows and enterprise operational platforms with emphasis on usability, modularity, and extensibility.
- Introduced modern product design workflows, reusable design systems, and AI-assisted tooling to improve collaboration speed and product planning efficiency.
- Working closely with engineering and leadership teams to align UX strategy with long-term product vision.

Design Lead | HealthPlix Technologies Aug 2021 – Apr 2024

- Redesigned EMR Visit Pad workflows, improving user satisfaction by 25% and reducing clinical documentation friction.
- Reduced doctors' note-taking time by 30% through workflow redesign and interaction optimization.
- Launched redesigned Doctor App, increasing new user adoption by 40% within six months.
- Led UX initiatives across healthcare products while mentoring designers and improving design review processes.
- Collaborated with product, engineering, and leadership stakeholders to scale enterprise healthcare workflows.

Senior UX Designer | HealthPlix Technologies Aug 2018 – Aug 2021

- Redesigned Patient App, increasing engagement by 35% through usability and onboarding improvements.
- Rebuilt and standardized the company-wide UI/UX process for better scalability and collaboration.
- Improved EMR task completion rate by 25% by redesigning complex clinical workflows.
- Established stronger UX delivery practices across design and engineering collaboration.

UI Designer | NDesign Aug 2017 – Aug 2018

- Worked directly with the CEO to deliver enterprise UI solutions, branding assets, and product videos.
- Improved client satisfaction by 30% through intuitive interfaces for US-based clients.
- Recognized as Best Performer within one month for delivering high-quality visual and interaction design outputs.

Senior Software Engineer | Robert Bosch Jul 2013 – Jul 2015

- Maintained and optimized C++ route calculation algorithms for automotive navigation systems used in premium vehicles.
- Worked on high-performance engineering systems with focus on reliability and optimization.
- Selected among top three winners in Winnovate 1.0 for conceptualizing a new Bosch Tools product idea.

Key Product & Platform Contributions

- IQHealth HMS Platform – Product modernization, modular healthcare workflows, and scalable enterprise UX architecture.
- Sample Transport System – Operational workflow design for inter-facility medical sample tracking and transfers.
- Student Management System – Enterprise workflow planning and UX architecture contributions.
- Healthcare EMR Ecosystem – Workflow optimization for doctors, patients, and healthcare administrators.
- Design System Development – Reusable components, design tokens, and scalable UI consistency practices.

Education

Bachelor of Engineering (B.E.) – Computer Science / Related Engineering Discipline

Tools & Technologies

Figma, Framer, Spline, Design Tokens, Design Systems, UX Research Tools, PRD Documentation, Agile Workflows, C++, Product Strategy

Languages

English (Advanced), Telugu (Advanced), Kannada (Fluent), Hindi (Intermediate)
